

Barnet CCG and Health Providers

‘You Said – We Did’

You said (Parent Community)	We did (CCG, Health providers and BPCF)
Parents wanted an opportunity to learn about health services, ask questions and feedback about personal experiences.	Conducted a survey with 40 parents present at the education training held on 13 September. The feedback directly informed and developed the training being delivered on 1 February 2018; coproduced with parents with the SEND Designated Medical Officer and Senior Children’s Joint Commissioner (Clinical Commissioning Group / Council). So far, we have over 40 parents booked onto this course!

Parent / carer feedback has directly resulted in the health conference being scheduled with the following aims:

- A better understanding of the local health system, including recent changes and the available pathways to care and support
- An opportunity to identify the key professional leads, what services offer and how to access them
- A platform for parent carers to share their views on what is working well in local health services for their children and families and what requires improvement
- An opportunity for the Barnet Parent Carer Forum to participate in a productive dialogue with health professionals to help improve the future of health services in the Special Educational Needs and Disability (SEND) Community.
