

**LONDON BOROUGH OF BARNET
LDF CORE STRATEGY AND
DEVELOPMENT MANAGEMENT POLICIES DPD**

Questions received from the Inspector dated 29 November 2011 and Responses made by the Council **Library Ref: INSP 006**

1. Is the Council able to supply updated versions of the original Table 2 of the CS (renumbered Table 3 in the PSAs) for all participants attending the housing session? I would like this table to be presented to all participants as I may need to go through the individual elements in it.

A tracked changes version of Table 3 is provided as an addendum to this response.

2. The LDS states that consultation on the preferred approach to the Site Allocations DPD was scheduled to take place in September 2011. Can the Council confirm if this has taken place and, if so, has the Council identified any sites for gypsies and travellers?

Public consultation on the Site Allocations DPD has not yet commenced. The LDS refers to the Reg 25 stage commencing in October 2011. The DPD forms part of our LDF Programme in accordance with the approved LDS. The Council has conducted significant frontloading for this document including three periods of call for sites (one of which was specifically with LSP Partners). Prioritisation of the Core Strategy and Development Management Policies has contributed to this slippage. We expect to launch the Site Allocations DPD in 2012.

3. Is there a zoning map accompanying the 2006 planning brief for the North London Business Park? Appendix 3 to the brief refers to different zones but does not identify where they are on the site?

The zoning map which forms part of Appendix 3 of the Brief is attached as an addendum to this response. The Brief on the website will be updated. replace the version of the NLBP Planning Brief on the website

4. The Council's statement on housing refers to a Panel report (CD076) but this does not appear in the Council's library version of October 2011, in the updated library or on the Council's website. Can the Council please confirm why it is not on the revised library list and let me know if I am meant to read it all or relevant extracts of it and, if so, which ones. I will need a paper copy of the document if I am meant to read it.

We are keeping the evidence base as up to date as possible to ensure the smooth running of the EIP. We have updated to ensure

our answers to the Inspector's questions are full and comprehensive. In making our Matters Statement we have had to refer to documents which are now considered useful additions to the Library List.

With regard to the Panel Report the relevant references to Barnet are at paras 3.33 and 3.34. We draw the Inspector's attention to these particular sections about housing targets.
